## MONTHLY FACTSHEET

all data as at 31 December 2016

### MANAGER COMMENTARY

Evenlode rose +2.8% in December compared to a rise of +3.8% for the UK All Companies sector and +5.0% for the UK market. Strongest contributors to performance included Spectris, Victrex and Diageo. Spectris shares continued to rally following a good trading update in November, Victrex released positive final results, and Diageo shares recovered somewhat after recent weakness. As in November, relative performance was impacted by a strong month for oil producers, to which the fund has no exposure. In terms of fund holdings the only negative contributor was IG Group, whose shares fell following an FCA announcement that represents a significant change in attitude towards UK spread-betting regulations. Since the month-end, we have exited the fund's position given the risk these regulatory headwinds present. Elsewhere in the portfolio, we participated in a placing of shares in Euromoney that reduces DMGT's ownership stake to below 50%. We view the move as positive, allowing the company more strategic independence to pursue its digital, subscription-backed growth strategy. It will also be accompanied by a significant increase in Euromoney's dividend.

Looking ahead to 2017, the global economic and political outlook is no less uncertain than it was at the start of 2016. Though the higher inflation/interest rate narrative has become consensual again, the risk from deflationary pressures remains very real with various structural factors unlikely to dissipate in the medium-term. In my view the aggregate Evenlode portfolio remains well placed to generate healthy cash flows and dividends through a wide range of economic outcomes. We will continue to manage fundamental and valuation risk where we feel it is in the long-term interests of our co-investors, and look forward to updating you on Evenlode's progress over the coming year.

The value of your investment and the income derived from it can go down as well as up, and you may not get back the money you invested, you should therefore regard your investment as medium-to-long term. The fund has the ability to invest in derivatives for the purposes of EPM, which may restrict gains in a rising market. Investments in overseas equities may be affected by changes in exchange rates, which could cause the value of your investment to increase or diminish.
