Markets continued to rise in February as leading economic indicators moved higher. Results season has been mixed with some familiar economic themes: the US is showing tentative signs of recovery; China has slowed but stabilised since the start of the year; Europe is tough but not as bad as it was last year, and much of the emerging world continues to grow at a good rate. In the face of this patchy backdrop companies in general are coping well. Global diversity and exposure to consumer demand in developing markets are proving particularly useful in this 'new normal' world.

The fund rose +3.8% compared to +2.2% for the IMA UK Equity Income Sector. The strongest contributors to return were Reckitt Benckiser (full year results) and Procter & Gamble. The most negative contributors were Pearson (full year results) and Smith & Nephew (full year results). Mr Market's current 'dash for yield' means that the opportunity set is narrowing and we are treading carefully, with a focus on ensuring that the portfolio's combination of quality and value remains attractive.

At the end of February the fund went 'ex' a final dividend of 1.83p (B Inc estimated). This brings the full year dividend to 5.02p (B Inc estimated), a year-on-year increase of +7.5%.

Hugh Yarrow, Investment Manager

Wise  Funds

RISK WARNINGS

Full details of the TB Wise Funds, including risk warnings, are published in the TB Wise Funds Simplified Prospectus which is available on request. The TB Wise Funds are subject to normal stock market fluctuations and other risks inherent in such investments. The value of your investment and the income derived from it can go down as well as up, and you may not get back the money you invested. Capital appreciation in the early years will be adversely affected by the impact of initial charges and you should therefore regard your investment as medium-to-long term. As a concentrated portfolio of 20 to 30 investments Evenlode Income carries more risk than a fund spread over a large number of stocks. The fund has the ability to invest in derivatives for the purposes of EPM, which may restrict gains in a rising market. Investments in overseas equities may be affected by changes in exchange rates, which could cause the value of your investment to increase or diminish. Every effort is taken to ensure the accuracy of the data used in this document but no warranties are given.
