## MANAGER COMMENTARY

Evenlode rose +1.9% in May compared to a rise of +1.4% for the UK market and +1.4% for the IMA UK Equity Income Sector. A continuation of M & A activity and reasonable global economic data helped the market higher.

The main positive contributors to the fund's return in May were Reed, Smith & Nephew and Imperial Tobacco. Reed rebounded after recent weakness on no specific news, Imperial Tobacco released reassuring results and Smith & Nephew rallied on talk of a possible takeover. The least positive contributors were Astrazeneca, IG Group and Sage. Astrazeneca fell back after management rejected Pfizer's final takeover offer, IG Group released a slightly weak trading statement, and Sage fell back after chief executive Guy Berruyer announced that he will step down in 2015.

Evenlode received significant inflows during the month. We have used this new money to add to existing holdings, with a slight bias to those positions with more attractive forward cash returns and dividend yields. The overall shape of the portfolio has changed little however: high forward cash returns have become increasingly difficult to find as the market has risen and we continue to tread carefully.

On 1st June the fund went ex a first quarter dividend of 1.32p (B Inc estimated), a rise of +12.8% year-on-year. Our ambition to provide shareholders with sustainable real dividend growth remains central to our approach.

## IMPORTANT INFORMATION

Evenlode Income is a sub-fund of the TB Wise OEIC. Full details of the TB Wise Funds, including risk warnings, are published in the TB Wise Funds Prospectus, the TB Wise Supplementary Information Document (SID) and the TB Wise Key Investor Information Documents (KIIDs) which are available on request and at [www.wiseinvestment.co.uk](http://www.wiseinvestment.co.uk). The TB Wise Funds are subject to normal stock market fluctuations and other risks inherent in such investments. The value of your investment and the income derived from it can go down as well as up, and you may not get back the money you invested. Capital appreciation in the early years will be adversely affected by the impact of initial charges and you should therefore regard your investment as medium-to-long term. As a concentrated portfolio of 20 to 30 investments Evenlode Income carries more risk than a fund spread over a large number of stocks. The fund has the ability to invest in derivatives for the purposes of EPM, which may restrict gains in a rising market. Investments in overseas equities may be affected by changes in exchange rates, which could cause the value of your investment to increase or diminish.
